Final Demo Script

Sweet Crumbs Bakery | About 3 minutes | Arsha J Albert

Before the demo

- Open the demo website (index.html in 06_Final_Demo) and check that it loads.
- Keep the PDFs open in case they ask for the plan.
- If the screen cannot be shared, send the website link or file to the mentor.

Script

Time	Step	What to say / do
0:00	Introduction	The question is: can AI write a first-draft business plan, and which parts are most likely to be wrong? The business is a fictional bakery, Sweet Crumbs.
0:30	Step 1: Prompts	Open two sections and show the prompt and the AI draft.
1:15	Step 2: Revenue model	Move the customers-per-day slider. Show profit, break-even and payback changing.
2:00	Step 3: Error log	Tap Check it on the 45% margin and break-even in month 2 claims.
2:30	Steps 5 to 7	Show the time comparison (8.5 hours vs 52 minutes), the before/after table and the peer feedback.
2:50	Conclusion	AI is a useful first-draft tool, but numbers and market claims must always be verified.

Possible Questions

Question	Answer
Why is the margin 14% when AI said 45%?	A small bakery has thin margins and fixed costs. The AI figure was unrealistic.
Which part was most wrong?	The financial numbers and the market statistics.
How did you check the numbers?	Recalculated in Sheets and compared with a second AI. Unproven items were labelled as assumptions.
Which tools did you use?	ChatGPT, Gemini, Claude, Google Sheets, Google Docs and Gamma.
What would you do with more time?	Run a local survey to get real market and price data.
